

## HEALTH & SAFETY POLICY

BISL is committed to ensuring the occupational and operational health and safety of its Staff, Associates, Suppliers and Contractors when engaged together in carrying out work for, and on behalf of, BISL

BISL operates a buddy system. We check each others PPE, fitness and awareness of the dangers inherent in the assigned work. We are jointly responsible for each others health and safety when in the workplace

**BISL recognises that, at all times, risks need to be held to a level considered to be as-low-as-reasonably-practicable (ALARP)**

BISL shall apply good industry practices and comply with all health and safety regulations throughout its offices and site locations, especially those pertinent to the work it has been contracted to complete

**Chuck Umeh**
